Kinda Alkhityar

Full-Stack Developer

PROFESSIONAL PROFILE

Motivated Full-Stack Developer with around 2 years of experience building modern, responsive, and user-friendly web applications. Skilled in developing complete web solutions from interface design and front-end development to database integration, authentication, APIs, and deployment. Focused on creating clean, functional, and reliable digital experiences while continuously improving technical skills and learning new technologies.

KEY STRENGTHS

- Building responsive websites and web applications
- Developing modern React-based interfaces
- Connecting front-end applications with databases and APIs
- Implementing authentication and protected pages
- Translating UI/UX designs into functional websites
- Writing clean and maintainable code
- Debugging and problem-solving
- Optimizing websites for different screen sizes
- Managing projects from concept to deployment

SELECTED PROJECTS

- Aqarati Syria — Real-estate web platform focused on presenting properties through a modern and user-friendly interface.
- Taaniqi with Iman — Arabic mobile-first fashion catalog developed with React and Supabase, including product management, authentication, WhatsApp ordering, and an admin dashboard.

- **Personal Portfolio —**
Interactive Full-Stack Developer portfolio built with React, Vite, GSAP, interactive 3D experiences, and advanced animations.
